

During the Deployment Journal -- *Installation Instructions*

Please follow all directions listed below for PC and MAC installation:

1. Insert the 'During the Deployment Journal CD' into PC disk drive
2. The 'Set-up – During the Deployment Journal' window will automatically appear on your screen – in MAC, you will have to locate the installation folder on your desktop and select/open it
3. Click Next
4. Click Next again
5. The current window asks if you would like to create an icon for the 'During the Deployment Journal' on your desktop. It is an automatic default to create a desktop icon for your Journal. If you would not like to have a desktop icon, click the box to the left of "Create a desktop icon" so it's no longer selected. (Note: It is highly recommended to have a desktop icon)
6. Click Finish
7. Click Finish one more time to finalize the installation
8. Proceed to your desktop. There will now be two icons on your desktop:
During the Deployment Journal
During the Deployment Journal Pictures
9. To begin using your During the Deployment Journal, double click on your "During the Deployment Journal" icon (make sure that you are connected to the internet)
10. A new internet window will open (you may have to Allow Blocked Content – this is definitely ok for your computer. The reason you may have to do this is simply because the program was built in 'Flex' and Flex runs with script and active content) Click Yes when a security prompt asks to allow this file to run active content.
11. Click: Click here to launch the During the Deployment Journal in new window
12. The 'During the Deployment Journal' will open in a new screen

Enjoy your During the Deployment Journal!
